The genocide in Gaza has been raging for more than half a year now, thousands of people have been injured, murdered, lie buried under rubble, millions have been driven from their homes and yet there is no end in sight to the Israeli terror attacks.

On 26.01.2024, the International Court of Justice in The Hague announced its first decision in the genocide proceedings between South Africa and Israel. The court considers it plausible that Israel is committing genocide in Gaza. Regardless of this, German arms companies continue to produce and supply weapons and weapons components for Israel, making them complicit in the countless war crimes already committed by the Israeli occupying army (IOF).

On April 8, 2024, Germany will finally be in the dock at the International Criminal Court in The Hague, accused by Nicaragua of aiding and abetting the genocide of Palestinians. The German government is Israel's second largest arms supplier and supplied the IOF with 47% of its armaments in 2023, tenfold export licenses and tenfold export revenues through arms sales. 303 million euros in one month instead of "only" 32 million euros in one year.

According to the BDSV e.V. (Federal Association of the German Security and Defense Industry), Germany is home to more than 80 companies that produce and sell armaments of all kinds, and their stock market prices are currently at their highest levels. Neither two world wars sparked by Germany - nor genocides committed or actively supported by Germany against Herero and Nama, Armenians, Jews, Sinti*zze and Rom*nja are enough for the German government to learn lessons from these crimes. Quite the opposite!

The German establishment also supports the genocide on an ideological level by the spreading Israeli war propaganda and through its campaign of systematic suppression and defamation of any voice that opposes it.
